

Human Granzyme B ELISA antibody pair

Catalog No. CKH330

10-plate format

Coating antibodies (2 vials)

Product: Monoclonal antibody to human granzyme B
Isotype: Mouse IgG₁
Production: *In vitro* using serum free medium
Purification: Ammonium sulphate precipitation and affinity chromatography
Buffer: Prior to lyophilization: 0.25 ml PBS + 125 mM trehalose
Application: Inject 0.25 ml distilled water into the vial and dilute 100 times in PBS. The content of one vial is sufficient for five 96-well ELISA plates (480 determinations; 50 µl/well).

Detection antibodies (2 vials)

Product: Biotinylated monoclonal antibody to human granzyme B
Isotype: Mouse IgG₁
Production: *In vitro* using serum free medium
Purification: Ammonium sulphate precipitation and affinity chromatography
Labeling: With Biotin-7-NHS (N-hydroxysuccinimide)
Buffer: Prior to lyophilization: 0.5 ml PBS + 1% BSA + 125 mM trehalose
Application: Inject 0.5 ml distilled water into the vial and dilute 100 times in PBS + 0.5% BSA + 0.05% Tween-20. The content of one vial is sufficient for five 96-well ELISA plates (480 determinations; 100 µl/well).

Standards (5 vials)

Product: Natural human granzyme B (cell-culture derived)
Application: Standard in an ELISA system
Reconstitution: Dissolve the contents of one vial by injection of 0.5 ml distilled water into the vial. Use immediately.

Conjugate (2 vials)

Product: SPP conjugate (Streptavidin-HRP)
Application: Inject 0.5 ml distilled water into the vial and dilute 100 times in PBS + 0.5% BSA + 0.05% Tween-20. The content of one vial is sufficient for five 96-well ELISA plates (480 determinations; 100 µl/well).
The product should be used in conjunction with TMB substrate

General

Sensitivity: < 10 pg/ml
Specificity: Validated for detecting natural human granzyme B
Sterility: Membrane filtered (0.2 µm)

cellsciences.com

Stability:

Lyophilized SPP conjugate is stable for at least one year at -20°C, the other lyophilized products are stable for more than one year at 4°C.

After reconstitution, the antibodies are stable for one year at 4°C (if kept sterile) and SPP for minimal one year at -20°C. The reconstituted standard preparation should be used immediately.

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
