

IFNB1

Goat Anti-Human IFN-beta Biotin Affinity Purified pAb

Catalog No.	CPI129	Quantity:	50 µg
Alternate Names:	IFB, IFF, IFNB		
Description:	Biotinylated Goat Anti-Human Interferon Beta		
Concentration:	50 µg/ml; after reconstitution with 1ml sterile Tris-buffered saline pH 7.3 + 0.1% BSA.		
Gene ID:	3456		
Specificity:	Detects human interferon beta in western blots		
Host:	Goat		
Immunogen:	Recombinant human interferon beta		
Isotype:	Human interferon beta specific goat IgG		
Formulation:	Lyophilized from a 0.2µm filtered solution in PBS + 50 µg BSA per µg of antibody.		
Purification:	Human IFN beta affinity chromatography and then biotinylated		
Applications:	Western Blot (0.1-0.2 µg/ml) with the appropriate secondary reagents. Optimal dilutions should be determined by each laboratory for each application.		
Storage & Stability:	After receipt, this product should be kept at -20°C for retention of full activity. Upon reconstitution with sterile Tris-buffered saline pH 7.3 containing 0.1% BSA, the antibody can be stored at 2-8°C for 1 month without detectable loss of activity. Reconstituted antibody can also be aliquoted and frozen at -20° to -70°C in a manual defrost freezer for 6 months without detectable loss of activity. Avoid repeated freeze-thaw cycles.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
