

Goat Anti-human 4-1BB Receptor/TNFRSF9 Affinity Purified pAb

Catalog No.	CPT113	Quantity:	100 µg
Description:	Goat Anti-human 4-1BB Receptor/TNFRSF9 polyclonal antibody		
Alternate Names:	CD137, CDw137, ILA, Ly63		
Specificity:	Recognizes human 4-1BB Receptor		
Host:	Goat		
Immunogen:	Recombinant human 4-1BB Receptor		
Formulation:	Lyophilized from PBS, pH 7.4		
Purification:	Biospecific affinity chromatography		
Reconstitution:	Centrifuge vial prior to opening. Add sterile distilled water to the vial to fully solubilize the antibody to a concentration of 0.2 mg/ml.		
Applications:	Western Blot: When used at a concentration of 0.1-0.2 µg/ml in conjunction with compatible secondary reagents, the detection limit is 1.5-3.0 ng/lane under either reducing or non-reducing conditions. ELISA: When used at a concentration of at least 0.5 µg/ml (assuming 100 µl/well antibody solution) in conjunction with secondary reagents, allows the detection of 0.2-0.4 ng/well. The optimal concentration should be determined by the user for each specific application.		
Storage & Stability:	Lyophilized antibody is stable for greater than one year at -20°C. Reconstituted antibody is stable for at least six weeks at 2-4°C. Avoid repeated freeze-thaw cycles.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
